Professional Summary

Senior Full Stack Software Engineer with 10+ years of experience managing, designing and delivering secure, scalable, production-grade systems across industrial, IoT, ERP, and e-commerce domains. Proven ability to own features end-to-end—from UI/UX to backend services, APIs, data modeling, and cloud deployment—while guiding architectural decisions and long-term technical direction. Strong background in C#/.NET, React, cloud platform (AWS), APIs, and enterprise integrations, with hands-on leadership experience as CTO and Product Manager.

Core Technical Skills

Front-End: React, TypeScript, JavaScript, HTML, CSS, Responsive UI Design

Back-End: C#, .NET, Node.js, REST, Microservices

Data: SQL (PostgreSQL, MySQL, MSSQL, Oracle), NoSQL (MongoDB), Data Modeling, Query Optimization

Cloud & DevOps: AWS (Lambda, EC2, S3), Docker, CI/CD (GitHub Actions/Jenkins)

Classification: General

Architecture & Quality: Code Reviews, Test Automation, System Observability

Other: ERP Integrations, IoT Systems, GIS-aware data concepts, Agile/Scrum

---

Professional Experience

Oncrets — Software Engineer & Chief Technology Officer

Oct 2022 – Present | Brazil

- Lead technical architecture and development of scalable, cloud-based platforms supporting IoT and industrial data workflows.
- Own features end-to-end: requirements, technical design, front-end, back-end services, APIs, testing, deployment, and monitoring.
- Drive Agile project execution, facilitating sprint planning, daily stand-ups, sprint reviews, and retrospectives to ensure timely delivery and continuous improvement.
- Guide architectural decisions, design patterns, and long-term platform strategy while mentoring engineers and enforcing best practices.
- Designed and delivered **Smart Jack**, an IoT device and data platform transforming post-tensioning processes in civil engineering.
- Implemented secure APIs, cloud integrations, and CI/CD pipelines improving reliability and release velocity.

Tech Stack: C#/.NET, Node.js, TypeScript, React, AWS, PostgreSQL, MongoDB, Docker, REST

Classification: General

Bow Valley College — Peer Technology Assistant (PTA)

May 2025 – Present | Calgary, AB

- Provide hands-on technical support to students, troubleshooting software, networking, and development issues.
- Collaborate with advisors to create technical resources and documentation.
- Strengthened communication skills while explaining complex technical concepts clearly to non-technical users.

Ideris — Product Manager / Technical Lead

Dec 2021 – Oct 2022 | Brazil

- Led product lifecycle and technical direction for a large-scale marketplace integration platform.
- Drove Agile project execution, facilitating sprint planning, daily stand-ups, sprint reviews, and retrospectives to ensure timely delivery and alignment across teams.
- Collaborated closely with engineering on API design, backend services, and data models.
- Delivered platform improvements resulting in **50% reduction in customer churn**.
- Integrated major marketplaces including Amazon, Mercado Livre, AliExpress, Shopee, and others.

Classification: General

Tech Stack: C#/.NET, Azure, Microservices, MySQL, Docker, REST

Pono Tecnologia — Founder / Senior Software Consultant

Jun 2019 – Nov 2021 | Brazil

- Delivered ERP-centric solutions and custom software for logistics and retail clients.
- Designed and implemented APIs and integrations between ERP systems and e-commerce platforms.
- Led data migrations, schema design, and performance tuning for enterprise databases.

Tech Stack: C#, ADVPL, MSSQL, Oracle, DB2, REST/SOAP APIs

GoLive Consultoria — Software Consultant / Developer

Jun 2011 – May 2019 | Curitiba, Paraná, Brazil

- Enhanced web applications for consultants' task management using PHP, JavaScript, and Node.js.
- Developed backend functionality with Node.js, MySQL, and MongoDB, optimizing database queries for improved performance.
- Developed frontend web and mobile applications with React.js and React Native.
- Collaborated on UI updates to improve user experience, leading to more efficient scheduling for consultants.

Classification: General

- Managed and delivered multiple projects following Waterfall methodology and PMI/PMBOK standards, ensuring structured planning, milestone tracking, and alignment with client requirements.

TOTVS — Senior Software Consultant

Aug 2008 – May 2011 | Curitiba, Paraná, Brazil

- Developed backend functionality with Node.js, MySQL, and MongoDB, optimizing database queries for improved performance.
- Developed frontend web and mobile applications using React.js and React Native.
- Collaborated on UI updates to improve user experience, leading to more efficient scheduling for consultants.
- Implemented ERP solutions for over 15 projects, focusing on CRM and BI modules, and developed custom reports in Crystal Reports.
- Managed projects following Waterfall methodology and PMI/PMBOK standards, ensuring delivery aligned with client requirements and timelines.
- Worked closely with clients to streamline business processes, ensuring systems met operational needs.
- Led post-implementation support, troubleshooting issues, and guiding users during adoption.

Classification: General

Education

Bow Valley College — Software Development (IT)

Jan 2025 – Dec 2026

Federal University of Paraná — Computer Science

2005 – 2008 (Incomplete)

Certifications & Recognition

- Dean’s List — Bow Valley College (2026)
- Students’ Association Award — School of Technology (2025)
- Cisco: Networking Essentials

Classification: General
